

Shannon Precision, Engineering, Clare

June, 2022

Phase 1

The busy production warehouse floors are swept using the [GSE1000](#) and scrubbed cleaned using the [GSD385](#). The chemicals help lift any dirt and grime on the ground.

Weekly Deep Cleaning

The Glanaco Services contract cleaning team undertake deep cleaning in Shannon Precision Engineering monthly.

Phase 2

The contract cleaning team also deep clean the bathrooms inside the warehouse. The bathroom floors are scrubber with out hand-held scrubber dryers and the lavatories are disinfected.
